

# CUSTOMER SERVICE

## ONLINE ORDERING

We recommend placing your order via our secure web ordering platform. This is the fastest and most accurate way to place an order.

You may order online at: <http://www.ensignemblem.com>.

To place an order online you must have a username and password. If you do not have a user name and password, please call your customer service representative.

Once you have your username and password, go to the Ensign web site. Click the "Customer Login" button and enter your username and password. This will give you access to the Ensign ordering platform.

On the Ensign ordering platform you can place orders, check on orders already placed, and retrieve information about items you have previously ordered.

You may also place your order via phone with any of our customer service representatives. Our office hours are:

8:00 a.m.- 5:00 p.m. (EST) in Michigan, Phone 800-521-0575, Fax 888-946-7583

8:00 a.m.- 5:00 p.m. (EST) in Georgia, Phone 800-532-4435, Fax 888-682-1126

8:00 a.m.- 5:00 p.m. (CST) in Illinois, Phone 800-892-9550, Fax 888-872-9649

8:00 a.m.- 5:00 p.m. (PST) in California, Phone 888-736-7446, Fax 888-331-1524

8:00 a.m.- 5:00 p.m. (PST) in Nevada, Phone 775-324-2264, Fax 775-324-2264

You may also place your order by fax.

## LAUNDRY TALK

LaundryTalk is the first forum designed specifically for the industrial laundry and rental garment industries. On this forum you can ask questions and get answers about the issues you and your company are facing.

To start communicating with the rest of the industry, visit [www.laundrytalk.org](http://www.laundrytalk.org).

## CUSTOMER SERVICE INFORMATION

**Shipping:** We normally ship UPS Ground. Shipping by DHL, UPS Air, and FedEx is also available. Please advise as to method of shipping preferred.

**Terms:** Payment is due in net 30 days.

**Returns:** All returns must be made within 30 days of shipment. If you wish to make a return, please contact your customer service representative for assistance. A restocking fee of 20% plus shipping charges will be applied for all returned stock items.

**E-invoicing:** Electronic invoicing is available. Please talk to your customer service representative if you would like to enroll in the e-invoice program

## SKETCHES & SAMPLES

Ensign's Electronic Sketch Pad (ESP) program is designed to provide you with the easiest and most efficient way to request sketches and samples. We know that sketches and samples are the most effective method of selling emblems. We also know that quick receipt of a sketch or a sample can lead to faster approval which can lead to a speedier installation. Our goal is to give you the competitive edge by providing you with top quality sketches and samples as quickly as possible.

The ESP program is designed to collect all the data needed to produce the sketch or sample you requested. Simply log in to the ESP program and enter the information necessary. For the fastest delivery, we recommend you request a sketch. Electronic sketches which are requested before 12:00 p.m. will be sent out via e-mail the next morning. This means a complete request with all the necessary information that arrives in our offices before 12 p.m. on Monday will be sent out as a sketch via e-mail on Tuesday morning.

Requests received after 12:00 p.m. on Monday will be sent out as sketches on Wednesday morning.

We recommend requesting a sketch of the design. Please be aware that requesting a sketch card or a physical sample of a design will require more time and set the installation process back several days.

Instructions for and training in using the ESP program are available. You can request a copy from your Account Representative or your Customer Service Representative.

# EMBROIDERY

## CUSTOM EMBROIDERED EMBLEMS

From the concept to the finished product, Ensign Emblem is equipped to meet your customer embroidered emblem requirements. We use state-of-the-art equipment to produce embroidered emblems that are both colorful and durable. Our top quality threads and fabrics will retain their color wash after wash and wear after wear.

Ensign also has an expert design staff which is always available to transform your existing logo, design or idea into a quality emblem. An emblem can be created from existing artwork, or our design team can develop an entirely new design for your customer's use.

Your customers have put a lot of thought and effort into developing the image of their companies. You can be assured that Ensign Emblem will treat that image with the greatest of care.

## DIRECT EMBROIDERY

The premium choice in logo wear will always be direct embroidery. A direct embroidered design is stitched directly into the garment, and is fully capable of withstanding even the harshest industrial wash cycles. Ensign can duplicate an existing design to exactly reproduce a company logo or image, or we can create a brand new look for your customer's company. Your customer chooses the garment, the thread colors and the size and the location, making each direct embroidered design a true work of art.

Just about any garment can be embroidered. Whether you need a jacket, sweatshirt, hat, chef coat or even an apron, direct embroidery can be used to add color and details that will customize the garment. All of Ensign's direct embroidered designs are created with only the highest quality products, including industrial strength colorfast polyester thread.

To place an order for direct embroidery, we recommend you use our Electronic Sketch Pad (ESP) system. To receive written instructions or personal training on how to use ESP, please contact your Ensign Sales Executive.

[WWW.LAUNDRYTALK.COM](http://WWW.LAUNDRYTALK.COM)

# SCREEN PRINT

## SCREEN PRINT EMBLEMS

Every screen print emblem from Ensign is custom printed to meet your specific needs. The key to a quality screen print lies in the color separation of the design. Ensign uses only the finest materials and the highest quality inks when creating our screen print emblems. Our inks are also mixed in our color lab, which allows us to get a quality and clarity that other screen print emblems just can't duplicate.

Ensign screen print emblems are durable and resistant to fading. Our selection of quality fabrics and inks also ensures these emblems will withstand the harshest of wash cycles.

The Ensign Design team is always on hand to ensure that the screen print emblem you request accurately reflects the image of your customer's company. Our expert designers understand the strengths and limitations of the screen print process, and are skilled at creating designs for this method of emblem creation.

At Ensign Emblem, we take the creation of screen print emblems very seriously. If you choose Ensign, you can be assured your customer will receive only the very best.

## NPRINT™

Nprint™ is next generation direct screen printing. A proprietary process, Nprint™ creates screen printed designs that have a comfortable hand and won't crock or crack. Ensign's unique ink mixtures and process allow printing with a color and clarity that other screen printers just can't duplicate.

The Nprint™ process is ideally suited for tee shirts, knits and other lightweight fabrics. Because the ink is applied evenly and more smoothly, the process creates a garment that is more comfortable to wear. The Nprint™ application process also produces designs that are extremely durable and able to withstand the challenge presented by an industrial garment wash.

To learn more about Nprint™ or to see a sample of the process, please contact your Ensign Sales Executive.

[WWW.ENSIGNEMBLEM.COM](http://WWW.ENSIGNEMBLEM.COM)

## FIRE RETARDANT EMBLEMS

These emblems will keep their cool when things get hot. If your customer's company uniforms will be worn in situations that could involve sparks, flame or high temperatures, flame resistant or fire retardant emblems are the right image identification.

Made with Nomex® fabrics and threads from DuPont, these emblems are available in colors that will compliment most uniform choices. Emblems can be ordered with flame resistant fabric, which is a fabric that would normally burn but is chemically treated to resist burning, or fire retardant fabric, which is a fabric that is made from a fabric that is inherently resistant to burning.

Whether the wearer needs primary or secondary protection, a fire retardant emblem can provide an additional level of safety while presenting the company image in an attractive way. Fire retardant and flame resistant emblems from Ensign can be colorfully embroidered with FR thread in the logo or design of your choice.

## REFLECTIVE EMBLEMS

Reflective emblems help employees be seen at dawn, at dusk, in the middle of the night, or during nasty weather. When work in less than ideal lighting conditions is required, these emblems help keep the garment wearer visible.

Reflective emblems from Ensign can be designed and embroidered with a company logo or with simple text. All our reflective emblems are industrial strength, designed to withstand the harsh conditions of an industrial wash cycle.

Reflective emblems are available in embroidery only.

## PRINTMATE™ EMBLEMS

When the primary factor in embellishment selection is cost, some companies select PrintMate product instead of a more premier image identification product. Although effective for brand identification, it should be noted that the PrintMate product line is considered to be an entry level option for embellishment marketing

The PrintMate Emblem has the fastest design to production cycle in the industry. The process used to create a PrintMate Emblem allows designs to be digitally printed on the emblem fabric. That means these emblems can be shipped in as little as 24 hours after order placement.

These emblems are “photo-realistic”, if you can scan a design, you can put it on a PrintMate Emblem. All PrintMate Emblems are vibrant, durable and custom created. The designs can be supplied by you, or created by our professional design team.

## SIGNETS

Signet Emblems provide the luxurious look of direct embroidery without requiring the design to be sewn into the garment. The embroidered background is created to closely match the garment on to which it is applied. By matching the color and texture of the background, it is possible to achieve the look of direct embroidery while maintaining a standard size for easy placement and emblem reuse.

The Signet Emblem is made from industrial grade colorfast polyester thread, providing long-lasting vibrant color. These durable emblems are also industrial laundry tough, and can be created specifically for you or to match an existing design. Thanks to the Signet Emblem, rental garments don't have to be lacking in style. These emblems allow your customer's company image to shine, without the commitment that direct embroidery requires.

Signet prices are based on a standard size rectangle that measures 1 ¼ x 4 inches. There is an additional charge for a Signet emblem in any other size. Please contact your sales representative for more information.

## Eliminate stockroom time and effort spent on ID tag removal.

Unlike regular ID tags, TUF Tags are designed to eliminate the removal process that results when a garment changes wearers. New TUF Tags can be printed and placed directly over the old ones. This means no more time wasted trying to remove the old tags, no dealing with residue left behind from the old tag and no discomfort, due to bulky or insufficiently secured tags, for the wearer of the garment.

## Eliminate ID tag read failures.

Our Image-Loc™ technology provides TUF Tag with the lowest barcode read failure rate in the industry. The print and image color and quality stays sharp and clear without any distortion, so barcode scanners can read them correctly every time. Whether you read it or bar code it, TUF Tag's Image-Loc™ technology makes sure your garment's identity is secure.

## Eliminate blurred and faded ID tags.

TUF Tag is industrial TUF! In fact, we're fairly certain the garment will wear out before our TUF Tag will. This unique ID tag is designed to withstand the extreme conditions in all industrial laundry wash cycles. These tags won't fade, run, discolor or distort.

This revolutionary ID tag from Ensign is designed to work with most high speed bar code printers, including those made by Monarch. Switching to TUF Tag is as simple as ordering a kit and installing the ribbon.

Stop spending time and money dealing with old style ID tags. Ensign Emblem has a better way to meet your garment identification needs.

At Ensign, we believe everyone should get to choose. That's why our Merlin system is the only in house emblem printing system designed to allow your company to work in the way that suits you best. The Merlin system can be placed on your laundry floor, or can be entirely web based, requiring very little space in your offices. Which version you choose is up to you.

Through the magic of Merlin our customers can design and print emblems in the way that suits their workflow. Design time is greatly reduced; an emblem can often go from design to production in minutes. Merlin also comes preloaded with thousands of clip art images and corporate logos, making the design process even simpler. Best of all, Merlin, being an adaptable wizard, is available in a variety of formats, one of which is sure to meet your needs.

- **Merlin System** – the complete package. One system that provides everything a company needs to design and print emblems in-house.
- **Merlin Lite** – the perfect solution for a company with satellite locations. One Merlin master system and one designer can create emblems which can be transferred to and printed at a remote location. Designs are sent by e-mail or transferred on disc. Once the design is received, it is loaded into Merlin Lite at the remote location and is ready to print with just a few mouse clicks.
- **Merlin-2-Go** – a web based application. Provides real-time, online design and printing of company fronts and text only names. Also allows printing of previously designed emblems from a customized and secure emblem gallery.
- **Club Merlin** – a unique subscription package that allows a company to experience all the benefits of Merlin without the upfront costs.

Experience the magic of choice and of Merlin for yourself. Request a demonstration and see what having a wizard at your service can do for you.

# ADDITIONAL PRODUCTS

## CAPS

For promotional or advertising purposes, caps are a great way to display a logo or company slogan. Please contact your customer service representative for price quotes on direct embroidery or screen printing on caps.

## HEAT SEAL EQUIPMENT

Ensign offers a complete line of heat seal equipment for all of your stock room applications. In addition to bonding both embroidered and screen print emblems, these machines can also be used to seal TUF tags, standard identification tape and our Signet emblems.

## PRESS PADS

Ensign carries an extensive assortment of press pads for all major heat sealing equipment. To ensure a successful bond, press pads should be checked and replaced periodically.
